

## ZAGORSKI BAGREMOV MED

**Category:** Designation of Origin

**Type of product:** Honey

**Product Description:**

Among the products that boast Zagorci stand out acacia honey. For several years, protected the brand "During Zagorje hills." Now they are going to promote "best of the best" - virgin acacia honey. For starters held the first festival virgin honey in the castle Oršić in Gornja Stubica. To the best of the best, as agreed by all who are in the castle Oršić tasted virgin acacia honey. Virgin is among izvrcan of honeycomb that the bees only produced and filled in a completely new foundation. Everything that is used for its production should be new, virgin. Because of its purity virgin acacia honey is most easily recognized by the color. Here I made a presentation. In the bottom of the jars is between virgin and on the upper side is plain acacia. What customers can see the first fight. It is fully illuminated during explained Zdravko Bedeniković of Partition. Such color of honey and other suggests its quality. Smell and taste are also a bit more pronounced. The production of virgin honey higher level than the usual mode of production. Therefore, the Virgin between should have a higher price. More is not so Zagorje beekeepers, with the support of the county, have launched promotions.
