

YACHANG DENDROBIUM OFFICINALE (雅长铁皮石斛)

Country of origin: China

Category: Special Signs of Geographical Indication Products

Type of product: Traditional medicine

Geographical Area : Guangxi Zhuang Autonomous Region Leye County administrative jurisdiction

Specificity of the Product: Dendrobium officinale has been desired by the royal family since the plant is known as the "daughter of gold", "soft gold" and "plant gold". In ancient folklore, it had the reputation of "life-saving immortal grass". In folklore, people would have fresh Dendrobium candidum juice put in their mouths because it was said it could bring people on the brink of death back to life. Usually those who got it were babies or those in critical condition. They are a type of wild orchid plant that is used as a medicine treatment; they have notable effects when it comes to curing disease or promoting longevity. They are listed in county records.
