

PUBEI RED VERTICILLIUM (浦北红椎菌)

Country of origin: China

Category: Special Signs of Geographical Indication Products

Type of product: Mushroom

Geographical Area: Guangxi Zhuang

Specificity of the Product: Pubei red verticillium, also known as red Russula or red wine mushrooms, are mycorrhizal edible fungi. They are one of the most rare, natural health-care edible fungi in the world. They are well-received by consumers at home and abroad. They sell well in Fujian, Guangdong and other provinces. Abroad, they are popular in Japan, Southeast Asian countries, Hong Kong, Macao and other countries and regions. Their market prices have risen year after year.

The fungi are covered with thick, slightly raised central capillaries. The tops are brown in places, red in others. They have a unique wild mushroom fragrance. When cooked in soup they are pink and have a sweet and delicious taste.
