oriGIn national and regional antennas: Statutes and standard agreement

6.5 National and regional antennas

National antennas can be established by GIs groups at the national level following the oriGIn standard agreement “Trademark and Partnership License Agreement” . As provided in the Agreement, such entities have the obligation to join oriGIn as collective members.

Regional antennas, to promote the exchange of information at the regional level, can be established in coordination with the Secretariat. Such entities remain directly linked to the Secretariat.
